A Tech Stack Tailored for Your Success

EXIGENT

At Exigent, we follow an operational strategy that combines long-term vision with quarterly agility, ensuring we're always prepared to innovate and overcome challenges by aligning resources with our strategic vision.

We apply that same strategy with clients: **The Exigent Method**. We uncover your business aspirations, identify key tactical areas, and pinpoint potential obstacles. This collaborative process allows us to tailor a precise IT roadmap—one that uses the right, specifically designed pieces to empower your business with the exact technology stack it needs to execute on your long-term vision.

Piece One: Build Your Foundation

The first piece of the tech stack provides a reliable, stable foundation for your IT ecosystem. Both levels of **Exigent Assurance Managed Services** - Resolution and Complete - include the essentials, with your choice of support configurations.

RESOLUTION	COMPLETE

BOTH TIERS INCLUDE

- Professional Helpdesk
- Server Monitoring & Maintenance
- Web Content Filtering
- Automated PC& LaptopMaintenance
- Managed Endpoint Detection & Response

THEN SELECT

- Remote support only
- Remote + onside + after hours support

Piece Two: Advanced Solutions

Next, plug in advanced components - cybersecurity, business continuity, cloud solutions, and consultative specialty solutions. Each meticulously chosen piece is crafted to fit seamlessly into your tech stack, fortifying your business against threats and facilitating growth.

⊕ Cloud

From custom Azure migrations and solutions to fully private cloud – we can enhance your business IT with affordable, flexible cloud computing.

- Microsoft Azure Design
- Microsoft Azure MIgration
- Cloud-to-cloud Google Workplace/M365 backup
- Private cloud solutions

⊕ Cybersecurity

Need advanced cybersecurity or compliance solutions? Layer managed security solutions over any tier of Assurance. Enhance your solutions with Vigilant Security Awareness Training.

- Firewall as a service
- Endpoint protection
- Email security
- Spam filtering
- Dark Web monitoring
- Vigilant Security Awareness Training

⊕ vCIO & Consulting

Let our network and app design experts handle your bespoke IT projects. Map an innovative advanced technology strategy support by award-winning managed IT.

- Network design and deployment
- IT roadmap and strategy
- Custom app development
- Compliance solutions

⊕ Backup & Disaster Recovery

Add customized backup, dependable recovery tools and integrated compliant solutions for complete business continuity.

- Backup solutions
- Recovery tools
- Cyber resiliency packages
- Business continuity solutions and planning
- Compliance specialties

Overwhelmed by the big picture? That is where our consultative **Exigent Process** comes in.

From Discovery to Improvement

EXIGENT

Because piecing together a tech stack can be challenging, our customers are paired with a skilled Exigent technical advisor and an onboarding specialist from the start. That dedicated team will navigate you through the discovery process that informs **The Exigent Method** – a step-by-step approach we've tested and refined for 25+ years.

From selecting the right level of Assurance Managed IT Services for your organization as the foundation for your tech stack to understanding your business objectives and targets, our process is all about collaboration. With that knowledge in place, we'll counsel your team to put the right-sized, impactful technology investments into place to create the exclusive technology stack to promote growth – all within your budget.

The Final Piece:
Turn Vision into Reality

With more than three decades of experience, Exigent is not just about assembling pieces; we're about turning your strategic vision into reality. Our tech stack is not a one-size-fits-all solution; it's a bespoke solution crafted with the unique pieces needed for your success.

Let's collaborate to create the perfect tech stack for your business's technology needs. Together, we'll ensure your IT supports your ambitions, enables growth, and adapts to future challenges seamlessly.
