

Exigent Technologies Technology Consulting Services

As a managed IT services provider, our mission is to provide proactive support and IT guidance for our customers. As we work together as partners, there may be opportunities for in-depth consultative projects focused on customized IT solutions that address a unique need within your organization's environment. To learn more about our consulting services, call 877-EXIGENT or learnmore@exigent.net

Microsoft Azure Consulting and Migration Services

Microsoft's cloud platform, Azure, is one of the most popular cloud platforms on the market today, ranking second only to Amazon's AWS. Its market share is growing rapidly thanks to several advantages, including:

- Competitive pricing
- Integration with existing Microsoft solutions and licensing
- Compliant, hyper-secure environment
- Hybrid capabilities
- Flexible and scalable

Whether you have just started to explore Microsoft Azure, are attempting to migrate to Azure, or need support or consulting services for an already-robust Azure environment, our team can help you accelerate deployment and then maximize your cloud investments.

- Azure Migration and Consulting Services
- Azure Architecture Consulting
- Azure Backup and Disaster Recovery Scenarios
- Azure Application Development, Migration, and Testing Services

As a [Microsoft Cloud Solutions Partner](#) with a proven track record and nearly three decades in business, our team of experts draws from more than 100 years of combined IT consulting expertise as we guide you through the adoption and use of Azure.

Office 365 Migration Services and Consulting Services

If you are concerned about migrating your business to Microsoft 365 or are currently using Microsoft 365 services but need help with your implementation, then working with a recognized [Microsoft Solution Partner](#) is a wise next step.

Our team has specific training and expertise in Microsoft 365, and we offer migration, consulting, and support services in four regions: New York, New Jersey, Colorado, and California.

Let us help you with:

- Complete Microsoft migration services, including professional project management
- Personalized post-migration Microsoft 365 training and support for your staff
- Microsoft Teams consulting and deployment
- Microsoft Teams phone deployment
- Microsoft 365 security policy consulting and management
- Microsoft Endpoint Management (intune)
- Microsoft Defender for Endpoint
- Microsoft Defender for Identity
- Microsoft Defender for Cloud Apps
- Microsoft 365 licensing recommendations
- Microsoft 365 administration support

Virtual CIO Services

Are you struggling to align technology with your larger business objectives and goals? Our vCIO services are the answer. Many small to mid-sized businesses struggle in the absence of an experienced CIO—lacking either the budget or knowledge to hire for that role. The result is often a haphazard approach to technology, cybersecurity, and other foundational business IT needs. Rarely can leadership align their business strategy with the technology needed to support or even accelerate growth without a qualified CIO.

Exigent's Virtual CIO services were built to bridge that gap. We offer executive-level strategic guidance on technology needs analysis, IT management, end-to-end tech lifecycle planning, and budgeting.

- Gain invaluable third-party perspectives on technology problems
- Streamline IT decision-making based on expertise and proven best practices
- Develop processes for IT audits and compliance
- Improve the efficiency of technology project management
- Streamline vendor and company stakeholder management
- Provide existing IT personnel mentorship and structured personnel development

Our vCIOs work on a retainer basis, so no lengthy contract is required. As an added benefit, Exigent clients can still outsource their other technology needs to different IT companies while using our vCIO services.

Improve Your Cybersecurity Strategy

Effective cybersecurity is a much greater sum than its individual products and solutions. Meshing and optimizing, then monitoring and managing a security ecosystem is challenging, to say the least. With sophisticated and inventive threats constantly bombarding organizations of all sizes, cybersecurity has become a 24x7x365 proposition—one that most small to mid-sized businesses are ill-equipped to manage.

Beyond our robust managed cybersecurity offerings, Exigent's team of expert engineers can provide best practices and guidance that will improve your cybersecurity posture immeasurably. Leveraging a powerful risk and assessment tool, we'll identify vulnerabilities and gaps, and then work side-by-side with your organization to resolve those issues. Safeguarding your business, client data, and employees is a profound responsibility, but Exigent can help you achieve the highest levels of risk management.

Network Infrastructure Consulting

Your wireless network infrastructure—LAN, WAN, WLAN, etc.—is a foundational part of your overall IT strategy. Its design, implementation, and management are critical to keeping your organization's systems functional and secure.

If you want employees to communicate and collaborate efficiently—in and out of the office—you need a stable, powerful network. Since 1997, we've been building networks that are fast, resilient, reliable, and intelligent. We'll work with you to understand your needs today—then design stable, scalable network solutions with the future in mind.

Whether we're enhancing your current network or designing and building a new network, rely on us to deliver robust, reliable networking solutions. We offer a wide array of networking consulting services.

- Network infrastructure consulting
- Design and implementation services
- Large campus, indoor and outdoor Wi-Fi deployment
- Infrastructure analysis
- Security policy consultation
- Access control
- Hardware and software sales and installation
